

Name: Chan Suvannet

Id: e20210429

TP01

❖ Lab01.1. Hello One's Name

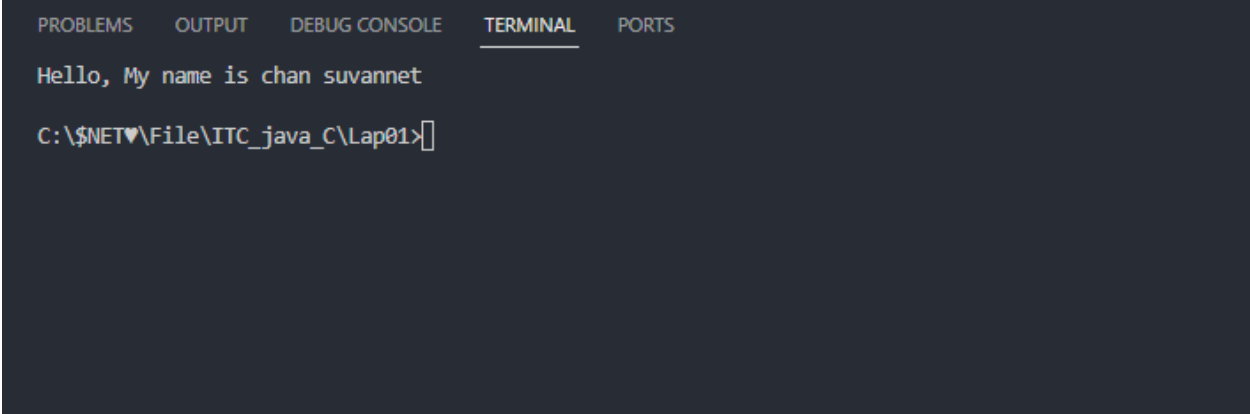

Implement an application Java that displays "Hello <your_name>!" where <your_name> represents your own name. Example, in case your name is: Visal, then:

---My Code

A screenshot of a code editor with a dark background. At the top left, there are three colored circles (red, yellow, green). The code is written in a light-colored font and is as follows:

```
1 public class TP01_1{
2     public static void main(String[] args){
3         System.out.println("Hello, My name is chan suvannet");
4     }
5 }
```

---Output

A screenshot of a terminal window with a dark background. At the top, there are five tabs: PROBLEMS, OUTPUT, DEBUG CONSOLE, TERMINAL, and PORTS. The TERMINAL tab is selected and underlined. The output of the application is displayed in the terminal:

```
Hello, My name is chan suvannet

C:\$NET\File\ITC_java_C\Lap01>
```

❖ Lab01.2. Display a Paragraph

Implement an application Java that displays the following output:

---My Code

```

1 public class TP01_2 {
2     public static void main(String[] args){
3         System.out.println("\\n");
4         System.out.println("\\t");
5         System.out.println("\\'");
6         System.out.println("\\\\");
7         System.out.println("\\\\");
8         System.out.println("//");
9         System.out.println("/*...*/");
10        System.out.println("\\\"\\\"\\\"\\\"\\n\\tText here\\n\\\"\\\"\\\"\\\"");
11
12    }
13 }

```

---Output

```

PROBLEMS  OUTPUT  DEBUG CONSOLE  TERMINAL  PORTS
\n
\t
\'
\"
\\
//
/*...*/
****
      Text here
****
C:\$NET\File\ITC_java_C\Lap01>

```

❖ Lab01.3. Asterisks

Write a program in Java to display shapes as below:

---My Code

```
1 public class TP01_3 {
2     public static void main(String[] args){
3
4         System.out.println("*****");
5         System.out.println(" *****");
6         System.out.println(" *****");
7         System.out.println(" *****");
8         System.out.println(" *****");
9         System.out.println(" *****");
10        System.out.println(" *****");
11        System.out.println(" *****");
12        System.out.println(" *****");
13        System.out.println(" *****");
14        System.out.println(" *****");
15        System.out.println(" *****");
16        System.out.println(" *****");
17
18        System.out.println("*****");
19        System.out.println("*");
20        System.out.println("*");
21        System.out.println("*");
22        System.out.println("*");
23        System.out.println("*");
24        System.out.println("*");
25        System.out.println("*");
26        System.out.println("*");
27        System.out.println("*");
28        System.out.println("*");
29        System.out.println("*");
30        System.out.println("*");
31        System.out.println("*");
32        System.out.println("*****");
33
34        System.out.println("1 2 4 3 5");
35        System.out.println("2 2 5 3 1");
36        System.out.println("2 1 1 4 7");
37        System.out.println("1 5 4 6 8");
38        System.out.println("7 8 2 1 9");
39    }
40 }
41
```

---Output

[illegible]

❖ Lab01.4. Table

Write a program in Java to display tables as below with values declared by variables:

---My Code

```

1 public class TP01_4 {
2     public static void main(String[] args) {
3         System.out.println("Number 1");
4         String line = "+-----+-----+-----+-----+";
5         String country = "| Country      | Name   | Profession | Age |";
6         String germany = "| Germany | Michael | Computer Engineer | 19 |";
7         String england = "| England | Robert | Artist      | 34 |";
8         String uk = "| United Kingdom | Julia | Designer      | 42 |";
9         String us = "| United States | Jo    | Actor         | 21 |";
10
11         System.out.println(line);
12         System.out.println(country);
13         System.out.println(line);
14         System.out.println(germany);
15         System.out.println(line);
16         System.out.println(england);
17         System.out.println(line);
18         System.out.println(uk);
19         System.out.println(line);
20         System.out.println(us);
21         System.out.println(line);
22
23         System.out.println("\n**Number 2");
24         // 2 8
25         String a = " " + "|" + " + 1 +|" + " + 2 +|" + " + 3 +|" + " + 4 +|" + " + 5 +|" + " + 6 +|" + " + 7
26 +|" + " + 8 +|" + " + 9 +|" + " + 10 +|" + " ";
27
28         String b = " " + 1 +|" + 1 +|" + 2 +|" + 3 +|" + 4 +|" + 5 +|" + 6 +|" + 7
29 +|" + 8 +|" + 9 +|" + 10 +|" + " ";
30
31         String c = " " + 2 +|" + 2 +|" + 4 +|" + 6 +|" + 8 +|" + 10 +|" + 12 +|" + 14
32 +|" + 16 +|" + 18 +|" + 20 +|" + " ";
33
34         String d = " " + 3 +|" + 3 +|" + 6 +|" + 9 +|" + 12 +|" + 15 +|" + 18 +|" + 21
35 +|" + 24 +|" + 27 +|" + 30 +|" + " ";
36
37         String e = " " + 4 +|" + 4 +|" + 8 +|" + 12 +|" + 16 +|" + 20 +|" + 24 +|" + 28
38 +|" + 32 +|" + 36 +|" + 40 +|" + " ";
39
40         String f = " " + 5 +|" + 5 +|" + 10 +|" + 15 +|" + 20 +|" + 25 +|" + 30 +|" + 35
41 +|" + 40 +|" + 45 +|" + 50 +|" + " ";
42         String dot = "-----";
43         System.out.println(a);
44         System.out.println(dot);
45         System.out.println(b);
46         System.out.println(c);
47         System.out.println(d);
48         System.out.println(e);
49         System.out.println(f);
50     }
51 }
52 }
53

```

❖ Lab01.5. String

---My Code

```

1
2 public class TP01_5 {
3     public static void main(String[] args){
4         // A. Write a program using a String function to print/check the length of a text "I Love My Hometown":
5         String text = "I Love my Home country";
6         int lengthText = text.length();
7         System.out.println("***Answer A: ");
8         System.out.println("The length is: " + lengthText);
9
10        //B. Write a program using a String function to cut the word "my little country" from a text of "I Love my little country":
11        String cutText = text.substring(7, 22);
12        System.out.println("***Answer B: ");
13        System.out.println("Cut Text: "+cutText);
14
15        //C. Write a program using a String function to find the index position of vowels in a text of "Hi Students!":
16        String textNumberC = "Hi Students";
17        System.out.println("***Answer C: ");
18        String vowel = "aeiouAEIOU";
19        System.out.println(textNumberC);
20        for(int i = 0; i<textNumberC.length(); i++){
21            char ch = textNumberC.charAt(i);
22            if(vowel.indexOf(ch) != -1){
23                System.out.println("\"" + ch + "\" is at index: " + i);
24            }
25        }
26
27        //D. Write a program using a String function check if two texts are equal
28        String text1 = "Hi Students!";
29        String text2 = "Students";
30        String text3 = "Hi Students!";
31        boolean isEqual1and2 = text1.equals(text2);
32        boolean isEqual1and3 = text1.equals(text3);
33        System.out.println("***Answer D: ");
34        System.out.println("Text1 is equal to Text2: " + isEqual1and2);
35        System.out.println("Text1 is equal to Text3: " + isEqual1and3);
36
37        //E. Write a program using a String function check if a text contains in another text
38        String text4 = "Hi Students!";
39        String text5 = "Students";
40        String text6 = "Hello";
41
42        boolean containsText2 = text4.contains(text5);
43        boolean containsText3 = text4.contains(text6);
44        System.out.println("***Answer E: ");
45        System.out.println("Text4 contains Text5: " + containsText2);
46        System.out.println("Text4 contains Text6: " + containsText3);
47    }
48 }

```

---Output

```
PROBLEMS  OUTPUT  DEBUG CONSOLE  TERMINAL  PORTS

***Answer A:
The length is: 22
***Answer B:
Cut Text: my Home country
***Answer C:
Hi Students
"i" is at index: 1
"u" is at index: 5
"e" is at index: 7
***Answer D:
Text1 is equal to Text2: false
Text1 is equal to Text3: true
***Answer E:
Text4 contains Text5: true
Text4 contains Text6: false

C:\$NET\File\ITC_java_C\Lap01>
```

❖ Lab01.6. Class & Object

Create a model following objects:

- Employee
- Car
- BankAccount
- Video

***Employee

1. Create a model of "Employee" class

Employee	Datatype	Variable Name
	String	name
	int	id
	String	position
	double	salary

2. Create objects from "Employee" class

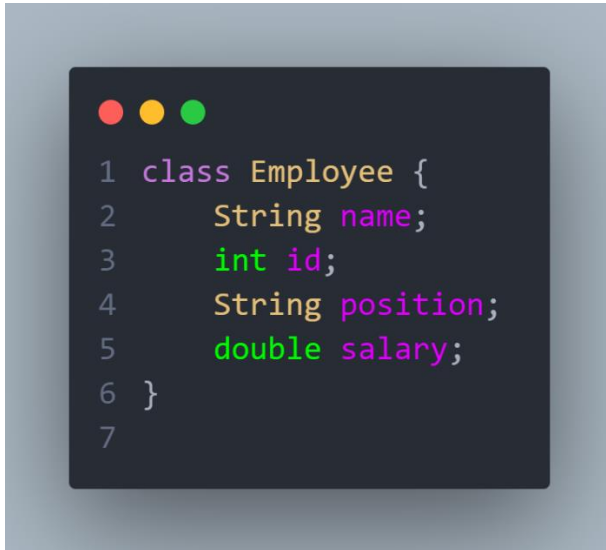

Object 1

Variable	Value
name	Chan Suvannet
id	1234
position	Hacker
salary	\$150.99

Object 2

Variable	Value
name	Chan Suvannet
id	1234
position	Hacker
salary	\$150.99

---My code

***Car

1. Create a model of "Car" class

Car	Datatype	Variable Name
	String	model
	String	color
	int	year
	double	price

2. Create objects from "Car" class

Object 1

Variable	Value
model	Lamborghini
color	pink
year	2023
price	\$25.99

Object 2

Variable	Value
model	GTR R35
color	yellow
year	2021
price	\$14.99

---My code

```
1 class Car {  
2     String model;  
3     String color;  
4     int year;  
5     double price;  
6 }
```

***Video

1. Create a model of "Video" class

Video	Datatype	Variable Name
	String	tittle
	String	subtitle
	int	duration
	int	releaseYear
	int	quality

2. Create objects from "Video" class

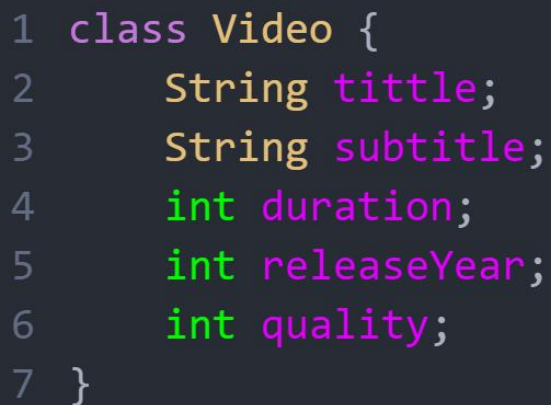

Object 1

Variable	Value
tittle	Zero to master to become hacker
subtitle	When you finished this course, you will become hacker
duration	120
releaseYear	2023
quality	1080

Object 2

Variable	Value
tittle	OOP course for free
subtitle	The best course for student at itc
duration	60
releaseYear	2023
quality	180

--My code

```
1 class Video {  
2     String tittle;  
3     String subtitle;  
4     int duration;  
5     int releaseYear;  
6     int quality;  
7 }
```

Note: Hello teacher, if you want to see my code clearly,
you can expand it because I took a screenshot with
codeSnap.
